DETAILED ACTION

Any rejections and/or objections, made in the previous Office Action, and not repeated below, are hereby withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelly (US 4,978,640).

Kelly discloses a product formed by firing (i.e., sintering) a mixture of feldspar having a particles size centered at 1 μm (i.e., a d_{50} of 1 μm) and alumina having a particle size centered at 0.06 μm (i.e., a d_{50} of 0.06 μm or 60 nm). See col. 4, Example 1, in particular lines 20-22, 29-30, and 58-60. The particle sizes of 1 μm and 0.06 μm result in a ratio of average particle sizes of 16.7.

The composite material is useful as a dental prosthesis or dental restoration. See col. 1, line 67 to col. 2, line 2.

Response to Arguments

Applicant's arguments with respect to claims 32-35 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
